 B.S., Information Management, [National University of Kaohsiung](#). Grad. 2019

---

**Jr. Frontend Developer, [Sakawa Technology Co., LTD.](#), Kaohsiung** Oct 2021 - Present

TypeScript(Vue) / JavaScript(ES6) / RESTful API / Socket.io / Element-plus / Tailwind CSS

- Collaborated with cross-functional teams, including backend engineers, graphic designers, and project managers
- Integrated APIs and discussed API structures with backend engineers based on interface requirements
- In large-scale projects, focusing on middleware tasks. Responsible for creating API interfaces, converting data types, and handling functions for API requests and payloads between frontend and backend

**Programming Instructor, [AppleBuds Inc.](#), Kaohsiung** Oct 2019 - Present

HTML / Python / JavaScript(ES5)

- Guided students below high school level in learning foundational programming languages and provided assistance in completing their projects

**Frontend Engineer Intern, [Melody Publishing Co., LTD.](#), Kaohsiung** Oct 2018 - Jan 2019

HTML5 / JavaScript(ES5)

- Built online English teaching platform
- Assisted in organizing API documentation and specification files
- Developed interface content based on specification documents by using HTML5 and native JavaScript

## SIDE PROJECTS AND HOBBIES

**[ShareHub](#)** - ShareHub is an English article and image sharing platform that enables users to effortlessly share and explore interesting content.

- Built with Vue 3, Vite, Element Plus, and Tailwind CSS
- Designed for internal use within an English-speaking community in the company, with an estimated user base of approximately 30-50 users

**[NUK International Student Application System](#)** - Designed for international students and administrative staff. The system facilitates online applications and provides comprehensive front-end and back-end functionalities to streamline the application process.

- Built with PHP, Native JavaScript(ES5) and MySQL
- Front-end: Empowering international students to apply to NUK by enabling document uploads, data entry, material downloads, and application progress tracking
- Back-end: Facilitating administrative staff at the international affairs office with tools for reviewing student submissions, conducting evaluations, and updating documents from the front-end
